

G. Jagadeesh

Software Engineer | Backend & Cloud

jagadeeshsagar40@gmail.com | 7989439720 | Hyderabad, India | Portfolio | LinkedIn | GitHub

SUMMARY

Detail-oriented Computer Science undergraduate with hands-on experience in backend development, microservices architecture, Docker containerization, and cloud deployment. Strong understanding of REST APIs and object-oriented programming. Actively working with AWS (EC2, DynamoDB) and Docker to build scalable and cost-efficient applications. Exploring Generative AI and agentic systems using Python and the Model Context Protocol (MCP).

SKILLS

Languages: Python, C, JavaScript, SQL

Frameworks: Django, Django REST Framework, FastAPI (learning)

Databases: PostgreSQL, AWS DynamoDB, SQL

Cloud & DevOps: AWS (EC2, DynamoDB, Serverless), Docker

Other: Cloud Native App, JWT Auth, Role-Based Access Control, REST APIs, MCP (Model Context Protocol)

EDUCATION

St. Martin's Engineering College

Bachelor of Technology — Computer Science

CGPA: 8.04 / 10

Secunderabad, Hyderabad

Oct 2022 – May 2026

PROJECTS

E-Commerce Backend API

- Developed a RESTful backend for an e-commerce platform using Django REST Framework with JWT-based authentication and role-based access control.
- Implemented product management, cart, wishlist, orders, reviews, and Q&A modules with full CRUD support.
- Used PostgreSQL as the primary relational database.
- Containerized the backend using Docker and deployed on AWS EC2.
- Built an MCP (Model Context Protocol) server exposing 31 AI-callable tool endpoints, enabling autonomous AI agent interactions with the platform a real-world agentic workflow.
- GitHub: <https://github.com/jagadeesh-sagar/ecommerce> | Live: <https://ecommerce.chatram.in/>

Microservices Deployment with Docker on AWS EC2

- Architected a multi-container microservices deployment on AWS EC2 using Docker, routing traffic between independent services.
- Each service runs in an isolated container, enabling independent scaling and deployment without shared state.
